

MOR, Inc Testing Services

Managed Organic Recycling, Inc offers Air Quality Sampling services using the EPA recommended sampling protocols. Samples are collected, tested, and field reports are issued for Air Quality evaluation.

Available Sampling Includes:

- Volatile Organic Compounds (VOC)
- Methane
- Ammonia
- Odor Capture

*Other Sampling available. Please contact MOR for details and pricing.

Air Quality evaluations are a key indicator of best management practices to reduce emissions in any composting facility, providing valuable data to support or refine your composting methods and operation.

AI Quality Training

AI Quality Training

AI Quality Training is a comprehensive program designed to equip professionals with the skills and knowledge necessary to excel in the rapidly evolving field of artificial intelligence. This training covers a wide range of topics, from foundational AI concepts to advanced machine learning and deep learning techniques. Participants will gain hands-on experience through practical exercises and projects, ensuring they are well-prepared to tackle real-world challenges. The program is structured to provide a solid theoretical foundation while also emphasizing the application of AI in various industries. By the end of the training, participants will have a deep understanding of AI's capabilities and limitations, as well as the ability to design and implement AI solutions. This training is ideal for anyone looking to advance their career in AI, whether they are a student, a professional, or a business leader. The program is delivered through a combination of self-paced learning and live sessions, offering flexibility and convenience. The AI Quality Training program is a key component of the AI Quality Training initiative, which aims to foster a skilled AI workforce and drive innovation in the industry.
